

NIKKEN

INDEPENDENT DISTRIBUTORS

THE TOTAL WELLNESS COMPANY

One day Sally's partner Bryce witnessed my distress in the office, I had been suffering terribly with my asthma and the medication seemed not to be effective. He mentioned the Air Wellness Power5 Pro by Nikken which Sally was marketing and with some scepticism I agreed to trial it. That was the best decision I had made for a while. Within two days of the installation near my desk, I noticed a marked difference in my breathing and a decrease in the level of coughing and distress I was experiencing when I sat within its immediate radius. As the days progressed it became patently clear that something good was happening and I grudgingly admitted that the properties associated with this amazing piece of kit were beyond dispute. My medication had made me extra sensitive to all my worse nightmare allergens, dust, dander, perfume and the cleaning properties of the Power5 Pro began my healing.

Close to the end of the second week with the Power5 Pro I secretly left it running overnight in the office and when I returned the next day, the relief I experienced at not coughing until my chest ached astonished me. It was agreed that one would be purchased and I have not looked back. It is about a year now since I've had the Power5 Pro and it still works silently in the background every day quietly scrubbing the atmosphere for the whole floor (open plan with about 80 staff members). As a result of its continuous use, I have noticed a marked decrease in the incidences of coughs and colds among staff and personally my breathing has cleared up to the point where I do not require my inhaler. I feel healthier for this and would recommend it to anyone who is experiencing respiratory difficulty caused by asthma. The machine is silent the only sound it makes is a pleasant cadence when you activate and deactivate it, the tones it emits are reminiscent of wind chimes in a Japanese garden (very very pleasant).

I don't want to ramble on but this device has improved my breathing tremendously and the impact on my quality of life is immeasurable and I would sincerely recommend it to anyone with breathing difficulties or any household or office needing to keep the day to day pollutions at bay.

Thank you

Catherine Sebastian
